**Please find below and/or attached an Office communication concerning this application or proceeding.**

The time period for reply, if any, is set in the attached communication.

<b>Office Action Summary</b>	<b>Application No.</b> 10/058,970	<b>Applicant(s)</b> PERKOWSKI, THOMAS J.	
	<b>Examiner</b> MARK FADOK	<b>Art Unit</b> 3625	

**-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --**  
**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after allowance or after an Office action under *Ex Parte Quayle*, 25 USPQ 74, 453 O.G. 213 (Comm'r Pat. 1935). Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, prosecution in this application has been reopened pursuant to 37 CFR 1.114. Applicant's submission filed on 12/23/2008 has been entered.

### ***Double Patenting***

1. Applicant has created quite a tangled web of similarly-focused pending applications, many of which are being examiner by this examiner. There appears to be no apparent rhyme or reason why so many applications are copending, nor any focus on any particular inventive twist or direction, thus failing to create a clear line of demarcation between the applications. See MPEP § 822. For this reason, there are an overwhelming amount of overlapping claims and concepts which are subject to the following double patenting issues.

2. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140

Art Unit: 3625

F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

3. Claims 497-507 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over the following claims of the following copending applications.

<u>Application</u>	<u>Claims</u>
11/804769	1-19
10/876261	154-170
10/812341	31-57
10/059078	49-58
10/602990	63-107
10/693856	63-88
11/823828	8-21, 37-53
10/059076	78-99
09/716848	497-507
09/695744	478-489
10/059076	78-99
10/058970	98-115
09/695744	478-489

4. Although the conflicting claims are not identical, they are not patentably distinct from each other for the following reasons:

- It would have been obvious to one of ordinary skill at the time of the invention to have provided such a system whether it is for offered products identified by

Art Unit: 3625

product name, description, trademark or for offered services identified by service names, descriptions and service marks.

- It would have been obvious to one of ordinary skill at the time of the invention to have characterized a BIN network with UPN/TM and URLs in a similar fashion as a collection of CPI links (URLs) in association with UPN/TM.
- A catalog of MMVK tags is taken to be equivalent to a library of MMVK tags and it would have been obvious to one of ordinary skill at the time of the invention to have employed a collection of tags so that the system can properly link to a URL (by a well known HTML tag) so that the consumer can request and receive product information for a particular product.
- It would have been obvious to one of ordinary skill at the time of the invention to have programmed the display modes of the MMVKs so that they deliver "information resources" as relevant to the consumer-requested product or service.

5. This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
